SUMMARY

Senior fullstack engineer with 12+ years shipping production software end to end: TypeScript, React, and Next.js on the client; Node.js and Ruby on Rails APIs, PostgreSQL and MongoDB, and GraphQL on the server.

I build AI-native products (LLM features, RAG, MCP on Plantfolio) and work AI-native myself daily with Cursor and Claude-class agents. Strongest where product, design, and engineering meet: clarify the problem, ship the UI and APIs, and verify the release helped.

SKILLS

Fullstack: TypeScript end to end: React / Next.js clients and Node.js APIs, PostgreSQL and MongoDB data modeling; Prisma; REST and GraphQL, Payments and commerce: Stripe, Shopify Plus (Bloom), KYC/risk-adjacent tooling (Tilia), Discovery → build → measure with product and design partners

Frontend: TypeScript, React, Next.js (App Router, Server Components), React Native, Flutter / Dart (Plantfolio iOS client), Tailwind CSS, Shadcn UI, Component libraries & design systems, Accessibility and performance-minded UI

Backend & data: Node.js, Ruby on Rails (~6 years through Rails 6), PostgreSQL, MongoDB (1+ year production on Plantfolio before Postgres migration), Prisma, GraphQL (production across multiple products), REST & API design, Async jobs / webhooks (Inngest), Stripe

AI-native product & engineering: AI-native product: LLM vision, chat, RAG/search in production (Plantfolio), MCP (Model Context Protocol) server in production on

Plantfolio, AI-assisted SDLC: Cursor (top 1% user), Claude Code-class agents used daily, Monorepos structured for agent-friendly iteration (pnpm, Turbo, typed TypeScript, tests), OpenAI API & AI SDK, AWS (S3, EC2), Vercel, Vitest & Cypress

EDUCATION

B.S. Finance, Santa Clara University, 2010

EXPERIENCE

Founder & Lead Engineer

Plantfolio | November 2023 - Present

AI-native product

- Shipped plant ID from photos, a contextual assistant (Sage), semantic search over 40,000+ species, and a production MCP server so external AI clients can call live platform tools. Customers use these features; they are not demos
- Build AI-native: Cursor (top 1% user) and Claude-class agents daily on a typed 12+ package TypeScript monorepo, with Vitest/Cypress and human review before production

Full-stack product

- Next.js and TypeScript web/API with Clerk, Stripe, Algolia, and PostgreSQL on Neon (15+ Prisma models) after a year of production MongoDB and a deliberate migration
 - Flutter iOS client (~20k lines of Dart) against the same REST API: Clerk auth, plant and folio management, photo ID, and Algolia search
 - Production signage rollout for an independent garden center: bulk plant import to printable signs in seconds, cutting a weekend of manual work to minutes. One retail customer in ongoing production and an enthusiastic reference
-

Senior Software Engineer

Tilia | January 2023 - August 2023

- Partnered with cross-functional teams in product and design to revamp critical user-facing features
 - Built and shipped work in support of KYC, identity verification, and risk-adjacent tooling as part of Tilia's payments platform (tools team context)
 - Introduced and evolved a GraphQL API on the platform while consuming it from our product, hands-on with both server-side schema/resolvers and client integration
 - Spearheaded and guided a team through the successful adoption of Chakra UI, reducing bespoke components and establishing cohesive design patterns
 - Mentored engineers through pairing and code review in an informal technical lead capacity (no direct reports)
 - Maintained exceptional unit test coverage of over 90% for the Tools team application, alongside comprehensive end-to-end testing
 - Led the swift creation and deployment of a homepage reporting dashboard within the initial two months of joining
 - Role ended in a company-wide layoff affecting approximately one-third of employees
-

Senior Software Engineer

Bloom.wine | September 2020 - October 2022

- Architected a greenfield Next.js application for the primary admin interface of the Bloom product; much of that stack remains in production across many winery clients today
- Engineered Ruby on Rails GraphQL API endpoints shared by multiple applications across mobile and web devices
- CI/CD with CircleCI for build, test, and deployment workflows alongside the Next.js and Rails stack

- Mentored engineers through pairing and code review in an informal technical lead capacity (no direct reports)
 - Collaborated with designers using Figma, establishing component library standards usable by both engineering and design
 - Integrated DatoCMS and extended application functionality through third-party API integrations (Shopify, Mailchimp, Stripe, Shipstation, ActiveCampaign); all Bloom winery clients were on Shopify Plus
-

Software Engineer II

Tune Inc - Marketplace Automation | August 2019 - May 2020

- Built and operated ETL-style data pipelines and integrations supporting marketplace automation workflows
 - Automated a client workflow using a Node.js/Express API and React.js, reducing the time to complete the task from 10-15 minutes to 10-30 seconds
 - Modernized the primary legacy React.js application by moving from a custom Webpack process to react-scripts, resulting in a 50% reduction in production build size and a 60% reduction in NPM dependencies
 - Reduced development machine CPU usage from 75% to <5% by simplifying the build pipeline and dependency graph
 - Role ended in a company-wide layoff
-

Software Developer

Ply Interactive Inc | June 2014 - July 2019

React Native

- Shipped multiple production React Native applications for agency clients: cross-platform mobile apps delivered end to end
- Washington State Fair: React Native app in sustained multi-year production; very high traffic during fair season, from tens of thousands of users into the hundreds of

thousands cumulatively over seasons

Web & platforms

- Developed numerous web applications including Georgetownbeer.com, WashingtonWine.org, TwoWolvesWine.com, Novaerus.com, WellAir, and Plasma-air.com
- Built a standalone Ruby gem Content Management System, enabling simplified content management within Ruby on Rails projects
- Transitioned the agency to modern technologies like GraphQL, Gatsby.js, and React.js, improving delivery times for new projects
- Bloom.wine Product Development: Built extensive reporting features using complex PostgreSQL queries and interactive filtering, saving clients thousands of hours on previously manual tasks
- Engineered a flexible Wine Club membership structure for wineries, allowing for diverse client configuration and broadening the range of potential sales targets
- Communicated and enforced the standards of Shopify's Polaris React.js component library with designers, resulting in efficiencies gained from leveraging pre-built components

COMPANY REFERENCE

Plantfolio (2023-Present) - AI-native plant management (Next.js web/API in production; Flutter iOS client WIP with auth, plants/folios, photo ID, Algolia search; vision, chat, RAG, MCP on live stack); 40,000+ species catalog - plantfolio.garden/

Tilia (2023) - All-in-one payment platform for digital economies - tilia.io/

Bloom.wine (2020-2022) - Commerce services for the alcohol industry; all clients on Shopify Plus - bloom.wine/

Tune Inc - Marketplace Automation (2019-2020) - SaaS platform for managing marketing partnerships across mobile and web - tune.com/

Ply Interactive Inc (2014-2019) - Boutique agency: web and production React Native apps (e.g. Washington State Fair at major scale); developed Bloom.wine product internally (2017-2019)
